-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hanes '862 in view of Faria et al.

Hanes '862 discloses applicants' basic inventive concept, a Stirling cycle cryocooler with a heat exchanger, a displacer cylinder 12 and a displacer cylinder primary mover which are contained in a housing having increasing diameters with transition areas between the sections and a vacuum flange and an endcap (both not numbered), substantially as claimed with the exception of forming the housing as a seamless unitary housing. Faria et al shows this feature to be old in the cryocooler art (Column 3 line 25

states that the "expander housing 65 may be formed from a single piece of metal". It would have been obvious to one of ordinary skill in the art at the time of applicants' invention from the teaching of Faria et al to modify the crocooler of Hanes '862 by forming the housing as a seamless unitary construction from a single piece of metal to ensure good sealing of the device. In regard to claim 21, it is noted that Faria et al do not discuss how the cylinders are formed in the metal. Official Notice is taken that machining is well known in the metal forming art to produce a cylinder from a single piece of metal.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lagodmos, Bamberg et al, Hoffman et al and O'Neil show cryocoolers with unitary housings.
